Backup your data without using slow and expensive tape drives.

Small enough to carry in your pocket.

Inexpensive – Less than half the cost of a tape backup system and tapes.

Add additional, plug-and-play storage to your system.

Archive data for quick retrieval.

The coolest and best way to carry huge data around!

Supports Windows 98, 98SE, ME, 2000, XP, MAC OS 8.6, 9.x, or X.

No additional software required!

Available in blue, black or brushed aluminum.

FAQs:

Q: Does this device also work with regular USB 1.1 port?

A: Yes, it is fully compatible with regular USB ports also, but to enjoy the high speed, you need USB 2.0 port.

Q: Does this device need a power supply?

A: No. However, if you use some mini USB hubs that can't supply enough bus power, you can use the double USB cable to get more power.

Q: What is a double USB cable?

A: It is a USB cable with an extra USB port to supply more power.

Q: Do I need install any driver to use this reader?

A: No driver is needed except for Windows 98 (driver included).

Q: Does this work with Mac?

A: Yes, it works with Mac OS 8.6 or newer

Q: What kind of capacities can I get?

A: We currently offer 20GB, 30GB, 40GB, 60GB and 80GB storage configurations – enough to backup an entire PC or network drive!
